

Smart Plug Mini

Monitors and controls home electronics.

The Smart Plug Mini allows you to instantly turn on and off any device from across the world – or from the living room.

The undemanding interface ensures an easy and intuitive way of adding the smart plug to your Smart Home system.

The Smart Plug Mini is based on Zigbee and can easily be integrated with other Zigbee products or smart control solutions.

Overview

Smart Plug Mini from Develco is an intelligent remotely controlled adapter. The Smart Plug Mini monitors the power consumption as well as enables the user to control electrical equipment by switching it on or off remotely.

Key features

- Accurate power consumption measurement
- Remote on/off control
- ZigBee Home Automation certified

Area of use

Homes and holiday homes.
Included in the *safe4 eco-system*.

Services

- Energy management.
- Frost guard can be included.

Technical specifications

General

Dimensions	Ø 41 X 45 mm
Color	White
Power supply	230 V
Power consumption	0.4 W
Radio features	Sensitivity: -101 dBm @ 1% PER Output power: +8 dBm
Environment	Operation temperature: 0 to +50°C IP class: IP40 Relative humidity 5% – 85%, non condensing

Functions

Specifications remote control	Max. switch voltage: 250 VAC Max. switch current: 10 A
Specifications power meter	Voltage range: 207 to 253 VAC Current range: 10A continuous, 16A (max 15 min.) Accuracy: Typ +/- 2% Optimum: 1% Reported resolution: 1 W

Certifications	Conforming to CE, RoHS and REACH directive
